

```
// C++ code for Tempsensor
int tempsensor;
void setup()
{
    pinMode(A2,INPUT);
    pinMode(12,OUTPUT);
    pinMode(13,OUTPUT);
}

void loop()
{
    tempsensor=analogRead(A2);
    if(tempsensor>=200)
    {
        digitalWrite(13,HIGH);
        tone(12,500,500);
    }
    digitalWrite(13,LOW);
}
```
